

# Overlighting Energies

The overlighting energies we are working with throughout this course for this healing and attunement.

**Elohim Astrea** and Purity, and Angels of Purity, Mother Mary (MA-RA), Muthu.

**Archangel Metatron** the masculine aspect of love, the principle of the cosmic divine plan for each individual. Achieving higher potential and sacred geometry. Focusing on the Soul Star chakra which holds your life purpose and soul blueprints.

**Archeia Sophia, Metatrons twin flame** Lady of truth, the feminine principle of divine love and wisdom of the cosmos, found in the grand central sun/heart of the universe. She is the divine mother of all creation, all divine mothers have been birthed from her essence (isis, Bast, Mother MARY, Quan Yin)

### **Archangel Sandalphon**

The twin brother of Archangel Metatron, working with the divinity on and through Earth. Focusing on the earth star chakra, and protecting the earth, oversees the crystalline grid. The crystalline grid is diamond lattice, the connector of the ley lines, power points and higher frequencies and crystal energies of the earth. It reflects and amplifies earth's ascension energies, keeping harmony between the earth plane and cosmos. He is a master of music and prayer helping us to weave the highest frequencies through us to anchor into the crystalline grid to raise earth's vibrations and our own at a root level, to bring balance, harmony and stability.

### **Archeia Shekinah**

Also known as Cybele, is the feminine aspect of god, a vessel for source energy she holds the divine spark within her womb. She is a graceful space holding for us to call on and work with, teaching us patience and flow to support growth.

### **Lord Melchizedek**

As one of the trinity of the lords of light with Archangel Michael and Metatron, he has a golden a white light, guiding the levels of inner and outer alchemy and evolution of our multidimensional consciousness. Bringing harmony and balance to the masculine and feminine within you, the teachings and principles of how to work with light, and the language of light.

# The Higher Rays of Divine light

After the fall of Atlantis many cosmic rays had been withdrawn from the planet, since the harmonic convergence of 1987 they have been slowly returning, and pouring onto the earth plane. Rays 8-12 anchored onto the Earth, April of 1994. These five rays carry a higher vibration of Source Light and are helping to activate our own Higher Light. Since 1994, rays 13-18 have been streaming onto the planet.

These cosmic rays help us to integrate aspects of our multidimensional selves. At this time the importance of lightworkers expanding and connecting consciously with their galactic chakras. Because this higher cosmic light stream comes down through them to bridge the multidimensional self.

**Rays 1-7:** The first seven rays are considered masculine rays and led predominantly by male ascended masters (along with archangels and the Elohim) and were focused through the seven stars of the Great Bear (Big Dipper).

**Rays 8-14:** In order to create balance, the new rays are considered feminine rays and led predominantly by female ascended masters (along with archangels and the Elohim) and are focused through the 7 sisters (stars) of the Pleiades. The new rays are infused with silver and gold by varying degrees – the silver ray represents the feminine quality, the essence of grace. The gold ray represents the masculine quality and spiritual authority. This yin/yang balance will aid earth's and humanity's ascension.

**Rays 15-18:** have a continually expanding focus of service into the galaxy and beyond – with galactic service, intergalactic service, stellar enlightenment, and multi-universal service.

\*\*This is where our focus is with these rays 15-18 and more particularly the Platinum ray, peach and diamond ray.

## **The Higher Rays**

**Ray 8** The Aquamarine Ray of Transcendence -Cleansing, Justice, Balance, Opportunity) 100% silver.

**Ray 9** The Turquoise Ray of Joy & Highest Potentials 75% silver, 25% gold.

**Ray 10** The Pearlescent Ray of the Light Body 50% silver, 50% gold.

**Ray 11** The Peach (Pink-Orange) Ray of Divine Love Illuminated Truth & Service 75% silver, 25% gold.

**Ray 12** The Gold Ray of Cosmic/Unity Consciousness 100% gold.

**Ray 13** The Copper-Gold Ray of Solar Service (100% gold).

**Ray 14** The Silver Ray of the New Order & Dawn of Peace (100% silver).

**Ray 15** The Silver-Gold Ray of Galactic Service (50% gold, 50% silver)

**Ray 16** The White-Gold Ray of Intergalactic Service.

**Ray 17** The Platinum Ray of Stellar Enlightenment

**Ray 18** The Diamond Ray of Multi-Universal Service

# The Platinum Ray of Stella Enlightenment

**Colour:** Silver with a hint of blue

**Signature:** Divine mother, divine feminine and the goddess. It works with the feminine principle of all beings. And the Absolute purification on every level so that self mastery can be obtained as a fully empowered being.

**Protector:** Mutuhu, is an ancient Lemurian earth mother who acts as guardian of this ray. It is a gift from the goddess of light and Angels of purity, Astrea. This frequency and light is not from this galaxy, it is Andromedan in feel and coming through in divine dispensation to support us in purifying, revealing truth, getting to the heart of a situation, healing and for personal and planetary evolution.

Its nature is to return humanity and our planet to its natural state, purification and rejuvenation. It's important for us to bathe in this ray often and bring it to the awareness of others we work with, it is the brilliance of the divine mother-goddess aspect of humanity, of integrity, heart and strength. It gives courage, cleanse obstacles and washes away karmic residue that's no longer necessary to re-seed and re-experience.

It cleanses the mental and emotional bodies of old patterns, pain of suffering of loss and grief. Clearing sadness and isolation, helping you feel the truth and intimate communion with the divine mother. This ray supports the return to the fully functioning 12 strand DNA. It truly supports the transformation of freeing us from slavery codes and programs of any kind.

It dissolves harsh chemicals in the land and atmosphere on an atomic level. The platinum ray was worked with to a high level during the seeding of lemuria as their light bodies began to form. During this time the earth was infused with the platinum ray from source to support the transition of souls as they entered the lower planes. During the lemurian timeline this ray was the ray of creation and master healing as we formed our light bodies and adjusted our frequencies. Which continued for many thousands of years

The Lemurians existed for over 6,000 years in earth time and during this time they were able to fully integrate the masculine and feminine aspects of the physical, mental and spiritual, to work together as one. Over time they had to lower their vibration and undergo a painful splitting process of masculine and feminine to create their lower energetic body, this split brought the ego's pain and we started our journey with the emotional body.

# Creating the Angelic Vortex

This exercise is to create and hold a supreme forcefield of love that supports the deep clearing we will be doing on this course. Working with the angelic seal of light to protect you and your space, and the archangels of this course.

**Important:** If you are doing healing work with clients, this practice can be done before the client arrives to set the vortex around her, as you invoke it for her. Or if you wish your client to be with the intent to visualise it and make it even stronger you can have them say it out loud, or you can say it with them to open the space. They do not have to do a declaration of intent, this is for you as the space holder to oversee, unless you feel they should for any reason.

## Practice

Situate yourself somewhere quiet and comfortable and do this work, and declare your intent out loud with a hand on your heart and one on the earth.

## Declaring your intent

I (name) fully align myself to source, mother father god, and pledge my love to the earth and highest heavens.

I ask to hold the keys of the flame of Purity and ascension in my heart and womb, with guidance and love of the lords and ladies of light and karma, Master Cosmos, The divine director, Serapis Bey, the Angelic hosts, Astrea and Purity.

I will only receive and move with what is in total and complete alignment with my highest and greatest good.

I will only receive the frequencies that my body can safely receive in harmony and grace, at this time.

### **Creating the Angelic vortex**

I (name) invoke the interdimensional Golden light of Archangel Metatron now, to fill my being and space through all layers. May he infuse and reactivate sacred geometry in my field through all chakras radiating outwards from soul star chakra, aligning my divine blueprint with my heart and womb complex. May he sit above me, guiding and protecting me. Receive the golden geometry of metatron as a vortex spins above you and moves down through your body and space.

**I invoke the light of Archeia Sophia**, mother of all, infuse my body and space through all layers with your light through the grand central sun, the heart of oneness. May she invoke her love, essence and truth through the heart and womb space, and through the hearts and wombs of all here present.

May she sit below me, holding and loving me through all release and expansion. Receive the diamond light and crystalline blessings of Sophia as it appears as a vortex of light below you. It sings to your light body from the ground up and connects in whole with Metatrons vortex. Both light grids connect fully with each other.

**I invoke the light of Archeia Shekinah**, and ask to receive her loving touch on my womb.

May she radiate her divine spark, wisdom and teachings through my womb space, and through the wombs of all here present. May she stand in front of me now, holding and loving me through all release and expansion with her light.

Receive the light and energies of Archeia Shekinah, as she places a vortex of light in front of you, its brightness grows and expands to fill you and your space and connect with the vortexes above and below you.

**I invoke the light of Archangel Sandalphon** now, to fill my being and space through all layers.

Calling forward the consciousness and all energies of the crystalline grid to ascend and descend through my whole being now, and merge with all versions of me through all timelines. Archangel Sandalphon please hold harmony through myself and the earth at this time as I move through great change, Anchoring me where I need to be, so I may be of greater service to this ascension cycle. May you stand behind me, protecting me in the highest frequency and song.

Receive the light and energies of Archangel Sandalphon, as he places a vortex of light behind you, its brightness grows and expands to fill you and your space and connect with the vortexes above, below and in front of you.

**I invoke the light of Elohim Purity** to cast her ring of white fire around me now, which intensifies the action and light of my white fire core, present in every atom of my being. I ask that she stand to my left, wrapping her wings around me and infusing my field with the light of purity.

**I invoke the light of Elohim Astrea** to cast blue flaming sword through my field and all parts of me now, I ask that she stand to my right, wrapping her wings around me and infusing my field with the light of truth.

Elohim Lock your cosmic circle and sword of blue flame around my being and space to support me in letting go of all distortion.

Thank you

And so it is.

At this time the vortex light is in place, we hold the intent and vision of it all connecting as one around and through us, through a series of light grids. I connect all light vortexes together, as above, so below. Expanding them through all layers of me, Archangel metatron please ensure security checks through all layers and levels 1,2,3,4,5,6,7,8,9,10,11,12 of me.

*Note: as you say the numbered layers out loud, visualize the vortexes and light expanding through you and expanding outwards through each layer.*

I ask all archangels to seal and hold this protective light through and around me now, As I allow them to place the seal of light through my light body, at the crown, heart and womb.

These seals are being held in front and behind of you, above and below you and to the left and right of you. They seal and lock in harmony, balance and light. Nothing of a low vibration can enter your being or space. You are held in a vortex of 12D high frequency light.

**Important:** When working on this with a client, have the angelic seal in the space for the session, you could show them it, grid crystals on it or place it under the treatment table. When you work with them it will be attuned to your lightbody so you will energetically be passing it to them and protecting them with it. You can visualize this in their aura and let it travel to where it needs to go.
